

There is no need for your son or daughter to struggle any longer.

IQRx is a training center that offers unique programs which dramatically enhance learning ability—**for both struggling and advanced students.**

IQRx's unique power comes from precise cognitive skills testing and our individualized, one-on-one skills training. Our patented programs overcome frustrating learning and reading problems in as little as 15 to 36 weeks. From preschool students through senior adults, **IQRx customized training can benefit anyone who wants to make learning, thinking, or reading easier and faster.**

As part of our commitment to help every family, professional testing is offered at a fraction of what others charge. We are committed to getting you the answers you need to help your son or daughter succeed.

It's easy to find out how IQRx can help.

You can get the answers you're looking for. Call to schedule a testing appointment for your child. The testing is fun, takes about an hour, and includes a follow-up consultation with a cognitive skills specialist. Think of the peace of mind you'll enjoy knowing exactly how and why your child struggles. Call now to guarantee improvement during this school year.

FASTER, EASIER LEARNING

Why **IQRx** is a better solution than tutoring.

Tutoring is often a band-aid that treats specific symptoms of a learning struggle, but does little to correct the cause.

Most kids need more. Tutoring can help catch up with missed information, but most learning struggles repeat themselves with every new challenge. This makes tutoring a frustrating and expensive choice.

IQRx is radically different. We overcome learning problems by asking: “What is causing the struggle?” Our testing and training identifies and strengthens the parts of the brain your child needs to learn and read better. Results are lasting and unmatched.

Skills testing can answer the question of why your child struggles. Targeted skills training provides realistic hope for a lasting improvement in how your child learns. Stronger underlying skills lead quickly to learning success.

Cognitive skills testing and training offer your child an opportunity that tutoring and other academic programs simply can’t—the ability to learn easier and faster in every subject.

Act now. Get the straight answers you need for your child. Call one of our learning experts today.

“ Kevin’s reading comprehension shot through the roof! He’s no longer intimidated by picking up a book. Kevin’s trainer was amazing. She captivated and kept him on task, something tutors were unable to do. Kevin has definitely benefited from this program. Thank you. ”

—David R.

Introducing IQRx

One simple question:

Are weak cognitive skills holding your child back?

BrainRx brain training programs exceed tutoring's ability to help parents find answers on questions about attention, academic performance, or learning difficulties. **Here's why:**

Fact!

People who struggle to learn or read do so for a reason. If repeated learning struggles suggest that your child has an underlying learning problem, consider a new, more precise approach to learning improvement. Get beneath symptoms to uncover the causes.

Fact!

Individual cognitive skill weaknesses are the most likely reason. More than a decade of research conducted by the U.S. Department of Education suggests that over 80% of learning and reading problems are due to a cognitive skills weakness. If underlying skills are strong, learning comes naturally. If skill weaknesses remain hidden and uncorrected, progress will be slow and struggles will continue with every new challenge.

Fact!

Cognitive skills can be improved for life. Testing pinpoints WHY your child may struggle. One-on-one training with a professional trainer is HOW your child's underlying skills can grow. Rapid, visible changes help kids experience soaring self-esteem, renewed confidence, and dramatically increased motivation.

One simple answer:

Have your child's skills tested.

Professional cognitive skills testing from IQRx is the best way to pinpoint the exact cause of any learning problem. IQRx Gibson test can also uncover unrealized potential in advanced students looking for a competitive edge. In the post-test consultation, you'll discover exactly how your child learns, why he or she struggles, and the steps you can take to see dramatic improvement this year.

If your son or daughter struggles to learn or read because of a cognitive skills weakness, we guarantee we can make a positive change.
